

SNEB Virtual Higher Education Fair

SPONSORED BY THE SNEB STUDENT DIVISION
2020 ANNUAL CONFERENCE
JULY 20-24, 2020

To facilitate networking and building connections in the virtual conference environment, Student Division has compiled advertisements for programs seeking **Master's** and **Doctoral** level students, and **Dietetic Internships** for those wishing to become a Registered Dietitian Nutritionist.

We hope that student members, and professional members looking to go back to school, get use out of this digital resource to connect with programs that they may not otherwise have even known about! Each program has a name and email for a program contact so you can get in touch for more info.

This is the first time we've done this, so we'd love your feedback! Tell us what you'd like to see in future iterations by contacting Geb Bastian, Student Division Chair at g.e.bastian@rutgers.edu.

What is SNEB Student Division?

Student Division is the special 13th Division representing the interests of students pursuing undergraduate or graduate degrees, and professional certifications such as the RDN.

All Society members with a student membership are automatically enrolled in Student Division – no membership dues and it does not count as your “free division!”

Like the other divisions, our aim is to add value to SNEB membership by hosting webinars, providing networking events, and presenting the special interests of our group to Society leadership.

Get Involved with Student Division!

Leadership:

Chair: Geb Bastian, RDN (Rutgers University) – g.e.bastian@rutgers.edu

Chair-Elect: Kritika Gupta, MS (University of Mississippi) – g.kritika23@gmail.com

Board Representative: Navika Gangrade, RD (Cornell University) – ng463@cornell.edu

Past Chair: Dan Dychtwald, MPH, MS (Drexel University) – dkdychtwald@outlook.com

Please join us for our Division Meeting on **July 29th, 6:00 PM EDT!** All are welcome to attend regardless of Society membership.

<https://global.gotomeeting.com/join/689548109>

Masters Programs

Ball State Online

Master of Science in Nutrition and Dietetics

Are you a Registered Dietitian Nutritionist who wants to complete a master's degree?

- Continue your career while pursuing your degree **100% online**.
- Earn your degree to **stay competitive with your peers**.
- Transfer up to 9 graduate credits.
- Choose from **thesis or non-thesis** option.

By attending this Virtual Higher Education Fair, you can **apply to our program for FREE!**

For more information, contact Dr. Carol Friesen at cfriesen@bsu.edu

bsu.edu/online/dietetics

**BALL STATE
UNIVERSITY**

Master's Degree in Nutrition & Dietetics

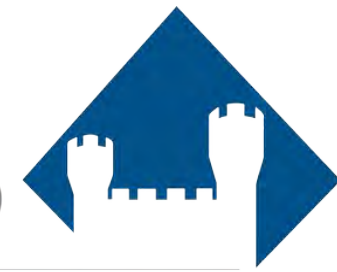

- Integrated coursework with supervised experiential learning in a competency-based curriculum.
- Program graduates will be eligible to take the Commission on Dietetic Registration (CDR) credentialing exam to become a Registered Dietitian Nutritionist.
- Accepting applications for fall 2021

For more information, contact Program Director:
Dr. Amanda Newell, RDN, LDN
anewell@fsmail.bradley.edu | 309-677-3736

Feed Your Passion

Pursue Your Masters in Nutrition

Welcome to the interdepartmental Nutrition Graduate Program. This program represents nutrition faculty, staff, and students from the NC State College of Veterinary Medicine and six departments within the College of Agriculture and Life Sciences: Agricultural and Human Sciences; Animal Science; Food, Bioprocessing, and Nutrition Sciences; Horticultural Science; Molecular and Structural Biochemistry; and Prestage Poultry Science.

For More Information:

Dr. Suzie Goodell

Director of Graduate Programs
suzie_goodell@ncsu.edu

NC STATE

College of Agriculture and Life Sciences

The FBNS Nutrition program offers:

Master of Nutrition (Non-thesis)

This professional degree does not require a thesis and is considered a "terminal" degree which does not provide research training leading to a Doctoral degree. Many students continue onto professional schools (medical, veterinary, and dental).

Professional Science Master: Master of Nutrition (Non-thesis)

This option requires that a subset of elective courses include approved business, communications, and regulatory affairs, and a practicum with a nutrition-related employer.

Master of Science in Nutrition (Thesis)

A Master of Science in Nutrition (thesis option) is recommended for students who are interested in gaining research experience related to any one of the numerous areas of study in nutrition. Students who receive a MS in Nutrition often use their training to obtain a research technical position within a company and/or as a step to obtaining a Ph.D. in Nutrition Science.

Students may complete their thesis work with faculty in any one of these departments as chair or co-chair of their advisory committee.

Research activities are as diverse as the Nutrition faculty and range in level from the molecular to the whole animal. Students majoring in Nutrition are affiliated with and housed in one of the departments mentioned above. The choice of department, as well as faculty adviser, depends on the research interests of the student. The choice of department and faculty adviser should start with a review of the research interests of the faculty; prospective students are encouraged to contact the faculty whose programs most closely match their research interests. Nutrition students frequently co-major with the program from the department of their adviser.

MASTER OF SCIENCE

Health & Well-being Management

PREPARE for a career in health and well-being program administration, design, and research.

APPLY to medical school, or a doctoral graduate program more prepared with a masters degree.

CUSTOMIZE the program to your career goals through the completion of 12-15 elective credits, in addition to the core courses.

VISIT www.rit.edu/HealthWellbeing-MS to learn more!

PROGRAM FEATURES

- ▶ Focus on research methods for health and well-being
- ▶ Two emphasis options

Training for:

- ▶ Nutrition education
- ▶ Health risk identification
- ▶ Health program dissemination
- ▶ Implementation science

EMPHASIS 1: CONTENT DEVELOPMENT, IMPLEMENTATION, AND EVALUATION

attends to the infrastructure of a health and well-being program, focuses on content development and domain expertise (e.g., exercise, behavior, nutrition).

 rit.edu/HealthWellbeing-MS
 healthandnutrition@rit.edu
 (814)-880-9977

EMPHASIS 2: HEALTH AND WELL-BEING PROGRAM MANAGEMENT

relates to the structure or framework of a program, managing a health and well-being unit within corporate or self-employment venues.

IUPUI SCHOOL OF HEALTH & HUMAN SCIENCES

Department of Nutrition & Dietetics

Master of Science in Nutrition and Dietetics

The IU Advantage

The Master of Science in Nutrition and Dietetics is a 36-hour graduate program whose coursework is rooted in collaboration and requires either a thesis or translational project.

This degree allows you to:

- Advance your academic training in the field of nutrition and dietetics.
- Critically evaluate and implement research.
- And prepares you for evidence-based practice in your community.

Indianapolis is your educational playground

IUPUI offers a unique and impactful environment in which to obtain your Master of Science in Nutrition and Dietetics.

As a student, you would be within walking distance of four of Indiana's leading hospitals, have access to over 400 community and clinical partnerships, and would benefit from existing collaborations of Nutrition and Dietetics faculty locally, state-wide, and nationally.

Apply today!

shhs.iupui.edu/admissions/graduate-professional/pp-doctorate-nutrition-dietetics.html

Post-Professional Doctorate in Nutrition and Dietetics

The IU Advantage

The Post-Professional Doctorate in Nutrition and Dietetics is designed to advance the education of **registered dietitians** inter-professional course work, evidence-based research, and leadership training. This 90 credit (of which you can transfer up to 30 hours of previous graduate coursework) **part-time program** is designed to meet the educational needs of advanced practitioners through a combination of traditional classroom and online courses.

The Post-Professional Doctorate in Nutrition and Dietetics coursework is rooted in collaboration and requires a translational project.

This degree allows you to:

- Advance your academic training in the field of nutrition and dietetics.
- Critically evaluate and implement research.
- Meet the challenges of a rapidly developing and changing profession.

**Application accepted from
August 1st-June 1st for a fall start**

Feed Your Passion

Pursue Your Ph.D. in Nutrition

Welcome to the interdepartmental Nutrition Graduate Program. This program represents nutrition faculty, staff, and students from the NC State College of Veterinary Medicine and six departments within the College of Agriculture and Life Sciences: Agricultural and Human Sciences; Animal Science; Food, Bioprocessing, and Nutrition Sciences; Horticultural Science; Molecular and Structural Biochemistry; and Prestage Poultry Science.

For More Information:

Dr. Suzie Goodell

Director of Graduate Programs

suzie_goodell@ncsu.edu

NC STATE College of Agriculture and Life Sciences

The Nutrition Program is founded not only on advanced study in nutrition but also in related biological, physical and social sciences. Particular emphasis is given to the development of creativity in nutrition research. An individual program of courses, which includes certain core requirements, is developed for each student by an advisory committee.

Research activities are as diverse as the Nutrition faculty and range in level from the molecular to the whole animal, from the individual to the community. Students majoring in Nutrition are affiliated with and housed in one of the departments listed above. The choice of department, as well as faculty adviser, depends on the research interests of the student.

Research programs are primarily in the area of nutritional biochemistry or experimental animal nutrition (e.g. horses, ruminants, swine, poultry, rodents, and other species), or community nutrition and public health.

Graduates find employment in academia, government, industry, and non-profit organizations, or continue their education in medical and allied health fields.

Graduate Program in

Nutritional Sciences

Program Overview

The nutritional sciences graduate program offers multidisciplinary training that provides a broad understanding of the field of nutrition and specialized knowledge needed for research in a subfield. We have M.S. and Ph.D. programs in these areas:

MS & PhD: Nutritional Biochemistry and Physiology • Use tools of molecular and cellular biology, biochemistry, and physiology to understand how organisms utilize nutrients for optimal health.

MS & PhD: Applied and Community Nutrition • Use sociological, psychological, and anthropological methods and education theory to investigate influences on nutritional status of individuals and communities.

MS: Dietetics • Use counseling, educational methods, and medical nutrition therapy incorporating supervised practice experiences to achieve competencies required for the Registered Dietitian/Nutritionist (RDN) credential.

Rutgers' graduate program in nutritional sciences is highly rated in the most recent National Research Council's Assessment of Research Doctorate Programs.

Doctorate in Nutrition and Dietetics (DND)

Indiana University is proud to announce **one of the first ACEND accredited doctor-level degree** designed to educate and foster future leaders in the profession of nutrition and dietetics by combining the academic work and supervised practice experiences that prepare students for the Registration Examination for Dietitians.

Indiana University's Doctorate in Nutrition and Dietetics (DND) combines the esteemed history of 100 years of a Dietetic Internship Program with over 50 years of experience in graduate education for registered dietitians.

The Doctorate in Nutrition and Dietetics provides a strong, academic foundation in nutrition and dietetics to allow you to meet the challenges of a rapidly developing and changing profession. The supervised practice component will prepare you to translate this knowledge into the provision of healthy, attractive food required for health and healing, patient care in the community and tertiary care hospitals, clinics, rehabilitation facilities, workplace wellness, and community nutrition services.

This three-year, full-time program includes 90 credit hours of graduate work and 1,264 hours of clinical rotations in a wide range of inpatient and outpatient settings.

Application requirements include:

- A completed bachelor's degree in **any major** from a regionally accredited institution
- Minimum cumulative undergraduate GPA of 3.0 on a 4.0 scale.
- Completed prerequisites (see our website for prerequisites needed)
- Three letters of recommendations
- IU Graduate CAS application and fee
- Admissions interview

**Application accepted from
August 1-December 1, 2020**

Apply today!

RUTGERS

UNIVERSITY | NEW BRUNSWICK

Dietetics– Individualized Supervised Practice Pathway (ISPP)

Rutgers University–New Brunswick

The Dietetics–ISPP program consists of:

- 30 graduate credits and at least 1200 hours of dietetics supervised practice.
- Students will typically complete the program in 4 terms.
- Most terms will include both classroom coursework and dietetics supervised practice placements.
- Evidence of prior learning may be substituted for up to 500 hours of supervised practice, subject to the approval by the Program Director.
- Evidence of prior graduate-level learning may be substituted for up to 12 semester credit hours for students entering with a baccalaureate (e.g., B.S.) degree as the highest degree earned and up to 24 credits for students entering with a Master's degree or higher.
- Completion of this program can lead to a Master's degree in Nutritional Sciences.

6 REASONS WHY USU'S DIETETIC INTERNSHIP IS THE RIGHT CHOICE

1. Flexible Schedule- Interns can start anytime of the year and complete rotations in any order, even scheduling breaks.
2. We Help You Find Preceptors- We have lists of potential preceptors in every state that can assist in locating training facilities.
3. USU DI Faculty- Program faculty are dedicated to the learning and development of their interns, providing one-on-one support and mentoring.
4. Cover the Costs- Interns can apply for FAFSA and scholarships through Utah State University.
5. Take the RD Exam Sooner- The internship is 31 weeks long, so most interns complete the program in 7-9 months.
6. Get a Job, Get a Masters- Interns earn 26 graduate credits that can be applied to USU's online Master of Dietetics Administration degree.
