

Developing High Impact Research Poster Presentations

Brandy-Joe Milliron, PhD¹ & Kate Gardner Burt, PhD, RD²

¹ Assistant Professor, Department of Nutrition Sciences, Drexel University, Philadelphia, PA
² Assistant Professor, Dietetics, Food & Nutrition Program, Lehman College, Bronx, NY

1

Learning objectives

Participants will be able to:

1. Describe the purpose of using posters to present research and innovative programs
2. Name 5 do's and 5 don'ts of poster design
3. Identify 3 non-visual components of a good poster presentation

2

Purpose of research poster sessions

- Highlight your research to create
 - Interest
 - Excitement
 - Connection
- Relaxed environment to present and discuss major findings
 - Meet new colleagues
- Select 3 main messages you want the poster to communicate

3

Three main messages

1

Filling the Gap
What is the significant gap in knowledge that your research addresses?

2

Innovative Methods
Are you employing innovative research methods? What are they?

3

Next Steps
Will your findings inform future interventions, programs, or dissemination strategies?

4

Value of research posters

- Opportunity to engage with others (networking)
- Good way to disseminate your work
- Receive constructive feedback, suggestions, helpful critiques
- Exchange ideas for future research and collaboration
- Help educate those outside your field
 - Spark multidisciplinary teamwork!
- Provides an interesting backdrop to your presentation

5

Consider your audience

- Consider your target audience and what their interest in your work may be
- Prepare for a multidisciplinary audience
- Ask for feedback from those unfamiliar with your work
- Practice your elevator speech and engaging questions

6

Poster size and specs

- Review the **conference poster guidelines**
 - Typical poster sizes are 4 x 6 or 4 x 8

Guidelines will typically include dimensions, set-up and dismantle instructions, and design recommendations

Paper and image quality is important

- Use high resolution images
 - Have others proof read before printing poster
 - Check and recheck your spelling!
- Avoid glossy paper
- For those with a larger budget, consider printing on cloth
 - Spoonflower.com: A more economic option

General layout

- Leave **negative space**
 - Don't fill every inch of the poster
- Organize and align your content using **headers and columns**
 - Use consistent spacing between sections and columns
 - Align corners along vertical and horizontal lines
 - Section headers should be distinct from body of writing
- Organize **top-down, left-right**
- Take inspiration from **infographics!**

Text: what to include and exclude

Include	Exclude
<ul style="list-style-type: none"> • Clear and concise, descriptive title • Author details and contact info • Section headers, bullet points, and bolding • Images, charts or graphs 	<ul style="list-style-type: none"> • Abstract (this is our opinion) • Jargon • A lot of paragraph text

10

Text critique

11

Choosing fonts and colors

- Don't use too many fonts OR colors
- Use contrasting colors for text and background combinations
- 2-3 colors; 1-2 text font types
- Sans Serif fonts are usually easier to read

Pleasing Font Combinations:
Helvetica / Garamond
Caslon / Univers
Futura / Bodoni
Garamond / Futura
Gills Sans / Caslon
Minion / Gill Sans
Myriad / Minion
Caslon / Franklin Gothic
Trade Gothic / Clarendon
Franklin Gothic / Baskerville

12

Font size and organization matters!

Guide:

- Titles – 96 pt
- Authors – 48 pt
- Headings – 36 pt
- Font – 24 pt

Example:

13

Poster critique

14

Poster critique

15

Title and author information:

- Use a catchy title
 - Concise but descriptive
 - Could be a question or focused on an important result
 - Should be able to read the title from ~20 feet away
- Include author and institution information
 - Doesn't necessarily have to be at the top of the poster
 - Include contact info for (at least) the first author

16

Background section:

- Abstract
 - Omit! (But this is our opinion)
- Background
 - Summarize and avoid jargon
 - Highlight significant gaps
 - Create a roadmap using **bulleted points**

17

Purpose and methods sections:

- Research Questions, Purpose or Objectives
 - List only main question(s) or objective(s)
 - Should be it's own section
- Materials and Methods
 - Present the basics
 - Sections can include (as applicable):
 - Study design, participants
 - Theoretical foundation
 - Data collection methods, instruments, intervention
 - Data analyses

18

Results and conclusion sections:

- Results
 - Limit to relevant or interesting findings
 - Use tables, charts, graphs, pictures
- Conclusion
 - Big picture?
 - Practice implications?
 - Recommendations for policy?

19

Additional sections (as applicable):

- Future Directions
 - Include suggestions for future research
 - Connect with your audience
- Acknowledgements and Funding
 - Those who contributed to your study
 - Source(s) of funding, grant # when appropriate
- References
 - Include but can be smaller font

20

Engage your audience during the session

- Have 2-3 short questions ready to help you engage and read your audience
- Prepare an elevator speech that summarizes your study
- Help your audience navigate your poster by providing a path for them to follow
 - Make key words stand out by using bold, italics, underlining or a different font type
- Create and practice an interesting story

21

Quick guide: how to write an elevator speech

- **Topic:** I am trying to learn about (working on/studying)... [your topic]
- **Question:** Because I want to find out... [who, what, when, where, how whether or why]
- **Significance:** In order to help my reader... [insert your target audience] understand how, why or whether... [insert rationale/focus of your research]
- **Example:** I am trying to learn about behavior change from a school-based nutrition and activity program because I want to find out how differences in program implementation and individual variation in self-regulation affect program outcomes. This is important because it will help researchers and program developers design more effective programs.

22

Network! Network! Network!

- Network and Share
 - Ask others about their research
 - Compile business cards; sign-in sheet
- Follow-up with an email that includes any or all of the following:
 - "Thank you for stopping by my poster about XYZ"
 - "It was a pleasure to speak with you about XYZ"
 - "I would like to learn more about your research/teaching/publications/XYZ"

23

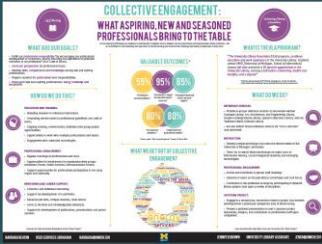

...so what are examples of GOOD posters?

Good posters are...

- Visually interesting from ~20 feet away
- Draw readers in by balancing components
- Visual complements to your verbal presentation

24

What makes this poster good?

25

26

27

Happy Presenting

10
TIPS FOR CREATING YOUR IMPACT
BULLETIN POSTER PRESENTATIONS

1. HAVE A MESSAGE
2. KNOW YOUR AUDIENCE
3. FOLLOW GUIDELINES
4. GET YOUR TRAINING ASSISTANT
5. PRACTICE YOUR ELEVATOR SPEECH
6. PREPARE FOR QUESTIONS
7. ARRIVE EARLY
8. BE ENTHUSIASTIC
9. HAVE FUN!
10. EVALUATE YOUR PRESENTATION
